

Course Overview:

This course provides you with a detailed overview and understanding of HTM 02-01. Attending this course allows you, as a prospective AP (MGPS), to carry out your duties effectively concerning medical gas supply plant and all medical gas distribution systems. This will also cover your ability to react correctly to emergency situations. Upon successful completion of the written assessment, you will be issued with a City & Guilds accredited certificate of achievement.

Who Is This Course For:

This course is designed for maintenance managers and other personnel, who have been nominated as the Authorised Person (MGPS) and need the detailed level of understanding that ensures they have the knowledge and competence to manage a medical gas system safely.

Key Learning Areas Covered in This Course:

- Introduction to HTM 02-01
- Statutory obligations
- Characteristics and safety requirements of medical gases
- Storage and management of medical gas cylinders
- Structure and management of the medical gas permit to work system
- Supervision of the Competent Persons and medical gas contractors
- Safe operation of medical gas plant and distributional pipework systems
- Design and installation of medical gas systems
